

1-a) Subjective -Transformed from state:

TSB-Pre

TSB-Post

1-b) Transformed to state:

TSB-Pre

TSB-Post

Instructions: a) Create a TFS and TTS that describe the desired transformation, b) Use the Energetic Dynamic Assessment above to inform mind-body awareness of the TFS (generally or for chief complaint), Optionally: MRT for TSB of TFS/TTS for each NMT Pathway, Always: MRT for the priority NMT Pathway to begin the session and assess TFS/TTS metric. A high "Transformed To" TSB metric is the index of blocked healing for that pathway. Be sure to confirm MRT validity with the "It is/is not" test.

IFs= the informational patterns that inform the TFS. TRiQs= the informational patterns that inform the TTS. Use dynamic MRT to "pulse in" complete awareness of Ifs and TrIQs to inform the desired transformation.
