Alternatively, identify some isolated specific issue for ED assessment:

Determine the “yes” and “no” energetic of topics of dysfunction contributing to the TFS and compromising manifestation of the TTS. As we begin a NMT session this use of the EDA better informs the priority NMT clinical pathway selection, using the Pathway Pyramid. This is an optional step that greatly enhances NMT clinical pathway choice to produce a more efficient clinical outcome.

	Indicated	Yes Metric	No Metric
Allergy	<input type="checkbox"/>		
Adverse influence of entanglement with a particular person or persons	<input type="checkbox"/>		
Anachroadaptive CDR physiology	<input type="checkbox"/>		
Anchored emotion	<input type="checkbox"/>		
ANS dysfunction	<input type="checkbox"/>		
Autoimmune inflammation or self-tissue/chemistry cross-reaction (to toxin, allergen,	<input type="checkbox"/>		
Cell intelligence issue	<input type="checkbox"/>		
CIAP	<input type="checkbox"/>		
ISR, UPR, endoplasmic reticulum stress, cell metabolic stress signaling and responses			
ISR, UPR, mitochondrial stress, cell metabolic stress signaling and responses			
Dysbiosis	<input type="checkbox"/>		
Functional neural network dysfunction	<input type="checkbox"/>		
Genetic chemistry conditions	<input type="checkbox"/>		
Healing pathway - tissue atrophy/degeneration	<input type="checkbox"/>		
Body Fluid Systems Pathway (BFSP) L-B			
Bone-Joint-Disc Healing and Remodeling Pathway (BJDHRP) L-B			
Dental Health and Repair Pathway (DHRP) L-C			
Injury-Malformation-Dysplasia-Metaplasia-Transplant Pathway (IMDMTP) L-B			
Neurological Healing, Regeneration, and Remodeling Pathway (NHRRP) L-B			
Hormonal excess, deficiency, or imbalance	<input type="checkbox"/>		
Infection	<input type="checkbox"/>		
Insect bite or venom	<input type="checkbox"/>		
Mechanical-structural injury to indicated structures	<input type="checkbox"/>		
Metaplasia-dysplasia	<input type="checkbox"/>		
Morphogenic field attunements – positive and negative resonance influences	<input type="checkbox"/>		
Nutritional excess, deficiency, or imbalance	<input type="checkbox"/>		
Postural/positional influence during the symptom associated activity			

Name: Last, First		Date:	pg. 2/2	
PTSD		<input type="checkbox"/>		
SMP dysfunction		<input type="checkbox"/>		
Cortical - subcortical conflict or incongruence of sensory stimuli		<input type="checkbox"/>		
Synesthesia of sensory stimuli		<input type="checkbox"/>		
Toxicity		<input type="checkbox"/>
